

SB.4 MANUAL RAISE ARM BARRIER

COMPLETE WITH BOOM, END REST AND FIXINGS

The SB.4 provides a low maintenance, cost-effective way of manually controlling access to unauthorised areas on a permanent or temporary basis. Durable and hard-working, this manual raise arm barrier has been manufactured for the last 32 years and comprises a robust and high quality pivot post, lockable end rest and aluminium boom.

Carefully designed pivot post has the strength to cover up to 8 metre road widths and still be easily operated by one person alone ! Also combined with a stainless steel pivot bar and two heavy duty, anti rust bearings this barrier is a great way of ensuring complete traffic management.

Our SB.4 can be locked in either vertical or horizontal positions with thanks to its padlock facility (Padlock and fixings included) and is available to cover road widths from 3 metres up to 8 metres. Half sizes are also available.

- Boom length available from 3-8 metres (booms 6.5m and upwards may come supplied in two sections)
- Alternative barrier colours available please contact us for more information
- Strong, lightweight aluminium boom – 76mm Diameter
- Can be padlocked in the up and down position . It is recommended the barrier is secured up or down, at all times.
- Bolt down to concrete as standard, concrete in option is available
- Padlock and anchor bolts supplied

Accessories:

- Light Weight Barrier Skirt (We recommend the heavy duty design for barriers over 6.5m with skirt)
- Stop, no entry or exit sign
- Pogo stick endrest
- Removable endrest
- Locking Sleeve (For locking double barriers)
